DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-8, 10-12, 17-20, 23-25, and 32-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Blanco US 5,292,022 in view of Howard US 4,927,048.

Blanco '022 teaches a cover for a beverage can in the embodiment of figures 2-3, comprising an adhesive protector (7'), which covers the top surface, but does not cover the pull ring (6'). The central rivet (8) remains exposed, and is taught in column 3, line 47 to be a "usual rivet" which are formed by a section of the top panel. Thus, with the cover applied, a portion of the center panel remains exposed. The top panel further includes reinforcing ribs (4'), and the cover could be formed of plastic, as taught in column 2, line 48.

The reference fails to teach an annular groove, or the filler material filling the groove.

Howard '048 teaches a beverage can end, having an annular groove and a protective cover, showing the protective cover fits into the annular groove (16). Annular grooves, or countersinks, are known to provide increased resistance to internal pressure.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the can of Blanco '022, providing an annular groove, and fitting the protective cover therein, motivated by the benefit of providing a sanitary cover over all portions of the end wall, and by the benefit of providing reinforcement to the end panel.

3. Claims 13-16 and 27-31 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
